

PEP Companion Application

Designed to work on many different devices

An application that sends reports directly to Health Canada's Pest Management Regulatory Agency. As pesticide-related issues often happen far from the computer, a mobile app allows users to communicate with PMRA immediately at the site of the incident.

- Modern UI design for a focus on ease-of-use and legibility
- Automatic draft saving allows for report writing on the go
- Built-in, seamless encryption keeps sensitive data secure
- Intuitive camera integration with geolocation

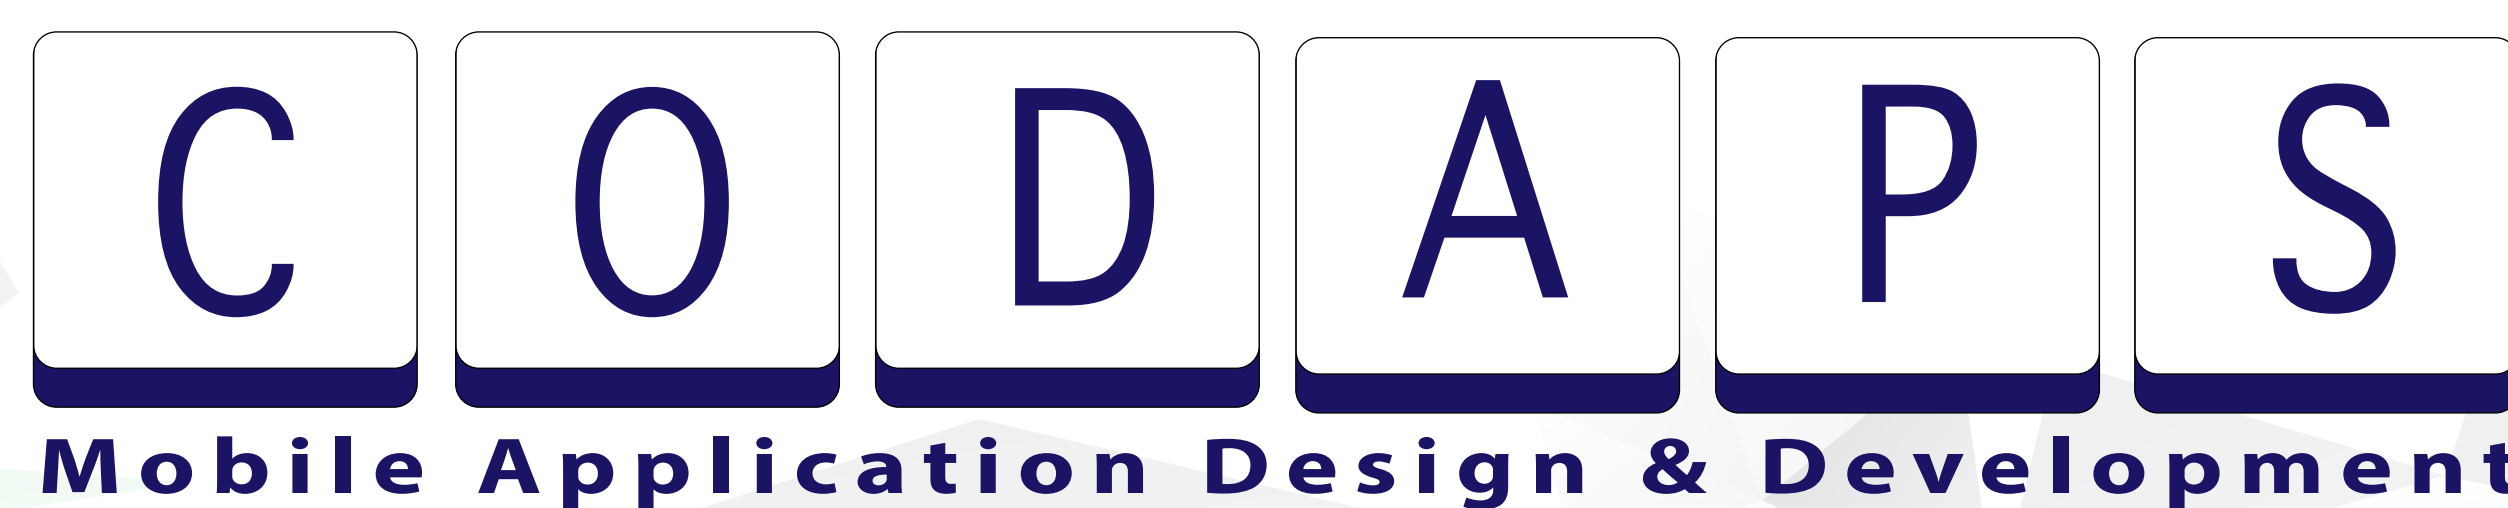

Team

Shannon Wilson - *Project Lead* **Alex King** - *Backend Programmer*
Paul Coyte - *Lead Programmer* **Owen Sheehan** - *Programmer*
Daniel Cormier - *Lead Designer* **Cody Armstrong** - *Graphic Designer*
